

Dear IDEAL+ Student,

You have been selected to participate to the 7thI3DC/IDEAL+ course 2020, congratulations! Please find enclosed the final version of the programme.

Now it's time to get ready for it.

- This year you need to get prepared to the course because many lessons will be straightforward practical, assuming that the students have already acquired the necessary basic concepts:
 - We invite you to:
 - 1) Reading the **GENERAL CONCEPTS**: it will help refreshing some concepts and focusing on basic information and course approaches. These lectures can be found in the Black Board I3DC/IDEAL+ course link to the e-learning section of the website <http://ideal-program.com>.
 - 2) Studying the lecture on “ **KEY POINTS ON ANTIBIOTICS AND ANTIBIOTIC STEWARDSHIP**” available on the same e-learning section website: <http://ideal-program.com>,
 - 2) As of lectures noted with * (*E-learning requiring lectures*), we expect you to have carefully looked at the corresponding E-learning lecture as a prerequisite self-learning approach.
- These lectures are to be found in the same E-learning section of <http://ideal-program.com>,

They include: sepsis, urinary tract infections, sexually transmitted infections, hepatitis, endocarditis, osteomyelitis, skin rash, IV infection, animal bites, ear nose and throat infections, vaccinations.

This prerequisite self-learning is COMPULSORY, as the matching training sessions will consist in PRACTICAL ACTIVITIES like clinical cases in small groups for which a strong basic knowledge is requested, so that you can actively engage into medical reasoning.

We expect you on high spirits and fresh minds on **the 17th February in Aula 6**, Polo Didattico Giovanni XXIII, *bring your smart phone, we need it for live Q/A.*

Best regards,

Federica WOLF
Kathleen DE GAETANO
Caroline CHARLIER
