

## WELCOME LETTER

Dear Friends and Colleagues,

It is with pleasure that I welcome you to Rome for **7<sup>th</sup> International Meeting on New Drugs and New Insights in Breast Cancer**, bringing together clinicians, mainly medical oncologists, and researchers including this year a substantial translational research component. The issues enlisted in this preliminary program, in particular including data from clinical trials stemming from that original basic research, demonstrate how the translation of basic research into practical clinical tools is particularly active in this disease.

The program has been designed in the pursuit of excellence and, as usually, all lectures will be presented by an international distinguished outstanding faculty who will report all their experiences and development.

I look forward to joining you and I also hope you can enjoy a unique and pleasant stay in our wonderful City.

Francesco Cognetti
