

UNIVERSITÀ CATTOLICA
del Sacro Cuore

Facoltà di Economia

Requisiti Statistica

Lo schema descritto nel seguito

- prevede, separatamente per ciascuno dei tre settori concorsuali considerati (13/D1, 13/D2, 13/D3), una lista di riviste con associata una classe di merito;
- descrive come calcolare un punteggio per ogni pubblicazione presente nella lista riferita alla procedura concorsuale in funzione della classe di merito della corrispondente rivista e del numero di autori;
- presenta valori soglia del punteggio complessivo (somma dei punteggi di ciascuna pubblicazione) richiesti per accedere al ruolo previsto dalla procedura concorsuale (attualmente RTD A, RTD B, professore II fascia, professore I fascia).

LISTE DELLE RIVISTE E CLASSI DI MERITO

- La descrizione della metodologia adottata per la costruzione di ciascuna lista è contenuta nell'Appendice 1: METODOLOGIA
- Per il Settore concorsuale (SC) 13/D* la lista delle riviste con la corrispondente classe di merito è contenuta nell'Appendice 2: LISTE, 13/D* LISTA.
- Al fine di favorire una transizione più graduale dai requisiti valevoli fino al 2021 ai requisiti in vigore per il 2022-2026, per ciascun SC, è presente un'ulteriore lista di riviste utilizzabili ai fini del calcolo del punteggio complessivo esclusivamente per le pubblicazioni avvenute entro l'anno 2017. Per il SC 13/D* la lista delle riviste con la corrispondente classe di

merito è contenuta nell'Appendice 2: LISTE, 13/D* LISTA PRE2017.

PUNTEGGI BASE

La Tabella 1 riporta il punteggio base assegnato a ciascuna pubblicazione in funzione della classe di merito della corrispondente rivista, limitatamente ai valori A.I, A.II, A.III, A.IV, B.I.

Tabella 1

| Classe di merito | Punteggio base |
|-------------------------|-----------------------|
| A.I | 1.5 |
| A.II | 1.25 |
| A.III | 1 |
| A.IV | 0.75 |
| B.I | 0.5 |

COEFFICIENTI MOLTIPLICATIVI

La Tabella 2 riporta il coefficiente moltiplicativo (peso) assegnato a ciascuna pubblicazione in funzione del numero di autori.

Tabella 2

| Numeri di autori | Coefficiente moltiplicativo |
|-------------------------|------------------------------------|
| 1 | 1.5 |
| 2 - 4 | 1 |
| > 4 | 0.5 |

PUNTEGGIO DELLA PUBBLICAZIONE E PUNTEGGIO COMPLESSIVO

Il punteggio della singola pubblicazione si ottiene moltiplicando il punteggio base per il coefficiente moltiplicativo (peso).

Il punteggio complessivo di ciascun candidato si ottiene sommando i punteggi delle singole pubblicazioni del candidato.

SOGLIE

La Tabella 3 riporta il valore minimo (soglia) del punteggio complessivo per accedere al ruolo previsto dalla procedura concorsuale ed i corrispondenti punteggi parziali (requisito temporale e di merito) che in aggiunta devono essere soddisfatti.

Tabella 3

| Ruolo | Soglia | Requisito temporale: punti | Requisito di merito: punti |
|-------------------------|---------------|-----------------------------------|-----------------------------------|
| Professore di I fascia | 11 | 3.3 | 3 |
| Professore di II fascia | 5 | 1.5 | 1.5 |

| | | | |
|---|---|-----|---|
| Ricercatore a tempo determinato (art. 24 comma 3-b L. 240/10) | 3 | 0.9 | - |
| Ricercatore a tempo determinato (art. 24 comma 3-a L. 240/10) | 1 | - | - |

La colonna "Requisito temporale: punti" indica il punteggio parziale che deve essere conseguito negli ultimi 5 anni solari precedenti l'indizione della procedura concorsuale. Eventuali periodi di congedo documentato non riconducibili ad attività di ricerca, di durata almeno pari a quindici giorni (arrotondata ad un mese), e comunque espressi in mesi, si aggiungono se il periodo rientra nel quinquennio, ovvero solo per la parte che vi rientri.

La colonna "Requisito di merito: punti" indica il punteggio parziale che deve essere conseguito con pubblicazioni apparse in riviste di classe di merito A.I.

APPENDICE 1: METODOLOGIA

La costruzione delle liste è stata ispirata da criteri di

- semplicità - impiego di un algoritmo di facile lettura e applicazione
- oggettività - impiego di liste di riviste e relative classificazioni correntemente utilizzate in ambito nazionale (ANVUR) e riferite a database internazionali (Scopus e WoS) che prevedono un aggiornamento periodico
- generalità - la metodologia di costruzione delle liste è la stessa per ciascuno dei tre settori concorsuali, pur con l'impiego di parametri di input (segnatamente *Subject categories*) specifici per ciascun settore concorsuale
- selettività - rafforzamento dei criteri correnti di accesso alla procedura di abilitazione ASN

SETTORI CONCORSUALI E DISCIPLINARI

I settori concorsuali (SC) ed i relativi settori disciplinari (SSD) considerati in questo documento sono descritti nella Tabella 1

Tabella 1: Settori concorsuali rilevanti per la determinazione delle liste delle riviste

| Settore concorsuale | Sigla | SSD ricompresi |
|------------------------------------|--------------|--|
| STATISTICA | 13/D1 | SECS-S/01 – STATISTICA SECS-S/02 – STATISTICA PER LA RICERCA SPERIMENTALE E TECNOLOGICA |
| STATISTICA ECONOMICA | 13/D2 | SECS-S/03 – STATISTICA ECONOMICA |
| DEMOGRAFIA E STATISTICA SOCIALE | 13/D3 | SECS-S/04 – DEMOGRAFIA SECS-S/05 – STATISTICA SOCIALE |

BASE DI DATI

La costruzione delle liste avviene per mezzo di un algoritmo che utilizza in input i seguenti dati

1. gli elenchi delle riviste forniti da ANVUR - VQR (2015-2019) - Area 13a - Scienze economiche e statistiche, i cui file zip VQR_journal_metrics_WoS_GEV13a_26022021 e VQR_journal_metrics_Scopus_GEV13a_26022021 sono disponibili al seguente URL: <https://www.anvur.it/attivita/vqr/vqr-2015-2019/gev/area-13a-scienze-economiche-e-statistiche/>;
2. l'elenco delle riviste di Classe A per i SC dell'Area 13 fornito da ANVUR - ASN - per l'anno 2021, pubblicato l'11.10.2021 e disponibile al seguente URL https://www.anvur.it/wp-content/uploads/2021/10/Elenco-riviste-classeA_Area13_Ilquad.pdf.

Gli elenchi di cui al punto 1. prevedono una classificazione delle riviste in fasce di merito secondo due database: Scopus e Web of Science (WoS). Ciascuno di questi inserisce ogni rivista in una o più *subject categories*; per ciascuna subject category vengono forniti due indicatori bibliometrici (*CiteScore* e *Scientific Journal Ranking* per Scopus; *5Year Impact Factor* e *Article Influence* per WoS), a partire dai quali la rivista è classificata in classi di merito (decrescenti) A.I, A.II, A.III, A.IV, B.I, B.II. Ogni rivista è quindi classificata in base a quattro indicatori per ciascuna subject category (tra le diverse fornite da Scopus e WoS) in cui compare. Inoltre tali classificazioni vengono fornite per ciascun anno tra il 2015 e 2019.

SUBJECT CATEGORIES

Presupposto per l'implementazione dell'algoritmo è l'individuazione di un insieme di subject categories per ciascun SC in coerenza con la declaratoria del settore stesso. Le subject categories utilizzate per la selezione delle riviste sono le seguenti:

Tabella 2: Settore concorsuale e subject categories di Scopus e WoS utilizzate

| Settore concorsuale | Subject categories Scopus | Subject categories WoS |
|--|--|---|
| 13/D1 - STATISTICA | "Statistics and Probability", "Modeling and Simulation", "Statistics, Probability and Uncertainty", "Applied Mathematics", "Safety, Risk, Reliability and Quality" | "STATISTICS AND PROBABILITY", "MATHEMATICS, INTERDISCIPLINARY APPLICATIONS" |
| 13/D2 - STATISTICA ECONOMICA | "Statistics and Probability", "Economics and Econometrics", "Social Sciences (miscellaneous)", "General Social Sciences", "Geography, Planning and Development". | "STATISTICS AND PROBABILITY" |
| 13/D3 - DEMOGRAFIA E STATISTICA SOCIALE | "Social Sciences (miscellaneous)", "General Social Sciences", "Demography", "Geography, Planning and Development", "Life-span and Life-course Studies", "General Business, Management and | "AREA STUDIES", "SOCIAL SCIENCES, INTERDISCIPLINARY", "DEMOGRAPHY", "FAMILY STUDIES", "SOCIAL ISSUES", "ETHNIC STUDIES", "SOCIAL SCIENCES, MATHEMATICAL METHODS", "PUBLIC, ENVIRONMENTAL & OCCUPATIONAL HEALTH" |

| | | |
|--|--|--|
| | Accounting", "Statistics and Probability", "Aging" | |
|--|--|--|

L'algoritmo utilizza la classificazione e i dati bibliometrici delle riviste relativi all'anno più recente disponibile (2019). Si precisa al riguardo che alcuni indicatori utilizzati dalla VQR prendono in considerazione le citazioni ricevute dalle riviste in un arco temporale pluriennale (ad esempio *l'impact factor* a 5 anni).

COSTRUZIONE DELLE LISTE

Per la costruzione della lista di riviste per ciascun SC sono considerate solo le riviste correntemente classificate come fascia A da ANVUR ASN (punto 2. di cui sopra). La lista ASN fascia A costituisce così un filtro per identificare all'interno delle liste VQR relative alle subject categories selezionate le riviste che ANVUR ritiene coerenti con il SC.

In definitiva, le riviste che concorrono al soddisfacimento dei requisiti scientifici dell'area Statistica per il SC 13/D* sono quelle che:

- 1) Compiono nella lista VQR (2015-2019) per le *subject categories* di Tabella 2.
- 2) Compiono contemporaneamente nella lista ASN dell'11/10/2021 in classe A (ossia con dicitura "A", oppure "A(2017)" oppure "A(2016)") nel settore concorsuale 13/D*.

CLASSI DI MERITO DELLE RIVISTE

Poiché a ciascuna rivista selezionata possono essere attribuite classi di merito differenti a seconda di subject categories di pertinenza e database (Scopus/Wos e relativi scores), si conviene di attribuire la miglior classificazione in A.I, A.II, A.III, A.IV, B.I, B.II tra tutte quelle disponibili. In altri termini, per ciascuna rivista si procede ad individuare tutte le subject categories (tra quelle selezionate in Tabella 2 per il rispettivo SC) in cui essa compare. A ciascuna delle risultanti subject categories si attribuisce la classificazione migliore tra quelle fornite dagli indicatori Scopus e Wos. Infine si seleziona la miglior classificazione tra quelle attribuite alle subject categories al punto precedente.

L'output finale, per ciascun SC, è una lista di riviste con annessi i rispettivi indicatori di classe.

COSTRUZIONE DELLE LISTE PER PUBBLICAZIONI PRE 2017

La generica lista 13/D* LISTA PRE2017 si ottiene nel modo seguente:

- Si considera l'unione delle riviste in fascia A o B dei requisiti valevoli fino al 2021 per il SC 13/D*.
- Si interseca l'insieme delle riviste ottenuto al punto precedente con l'unione delle riviste che compaiono nelle subject categories del rispettivo SC (Tabella 2).
- L'insieme ottenuto al punto precedente viene infine intersecato con l'insieme delle riviste di classe A ASN fino al 2017 (ossia con dicitura †(2017)).

APPENDICE 2:
